SUMMARY

Full-stack engineer with 10+ years of experience building scalable web applications across enterprise and growth-stage environments. Specializes in full-stack engineering with a track record delivering revenue-driving features at Dropbox and leading full-stack architecture for federal and enterprise clients. Adept at AI-assisted development workflows, cross-functional collaboration, and technical mentorship.

EXPERIENCE

AdHoc Research Associates, Havre de Grace, MD — *Senior Computer Programmer*

Oct 2025 - Present (contract) | Remote

- ➔ Architect and deliver custom enterprise web applications using PHP 8+ and VueJS, leading full stack development initiatives aligned with stakeholder and federal engineering requirements.
- ➔ Integrate automation and AI assisted development workflows to accelerate delivery, improve testing coverage, and enhance code quality standards.
- ➔ Design scalable backend services and RESTful APIs in PHP while building reactive, component driven frontends using VueJS and modern JavaScript tooling.
- ➔ Apply advanced problem solving and systems analysis techniques to reduce technical debt and guide long term application architecture strategy.

Dropbox, San Francisco, CA — *Full Stack Engineer*

May 2021 - April 2025 | Remote

- ➔ Led AI chatbot rollout to revamp tier one support, boosting CSAT by 20% and ensuring seamless cookieless tracking for Chrome compatibility.
- ➔ Built full stack applications supporting multi million dollar revenue pipelines, integrating third party APIs for scalable, user centric solutions.
- ➔ Owned real time production monitoring and SEV incident response using Sentry, Kibana, and PagerDuty, safeguarding monetization pipelines and A/B testing systems.
- ➔ Drove measurable performance gains across internal services by identifying and resolving latency bottlenecks through systematic profiling and optimization.
- ➔ Architected API integrations to streamline workflow automation between Dropbox tools and third party platforms, reducing manual engineering overhead.
- ➔ Led cross functional initiatives to improve internal tooling, infrastructure reliability, and deployment processes across multiple engineering teams.
- ➔ Built data driven dashboards to surface platform efficiency metrics, enabling proactive bottleneck resolution and reducing incident response time.

ThriveDX, Miami, FL — *Lead Software Development Instructor*

December 2020 - December 2023 (Part-time) | Remote

- ➔ Instructed students in programming fundamentals and equipped them with the skills necessary to become successful Software Engineers.

Service Express, Grand Rapids, MI — *Senior Software Engineer*

July 2020 - April 2021 | Remote

TECHNICAL SKILLS

Programming & Development Frameworks

JavaScript, TypeScript, Python, Laravel, Express.js, Node.js
PHP, React.js, Vue.js
MongoDB, MySQL, MariaDB, Postgres
TDD, BDD, Unit testing

DevOps:

Linux
Apache, Nginx
Docker, AWS, Redis, Jenkins, Git, Gitlab,
Github, Elasticsearch, Slack, Sentry, Vortex, Selenium, Kibana, Logstash, PagerDuty, CI/CD, Babel, NPM, Yarn

EDUCATION

Bachelor of Science, Information Systems Technology

Seminole State College of Florida
Magna Cum Laude

Associate in Science, Computer Programming and Analysis

Seminole State College of Florida
Magna Cum Laude

TECHNICAL CERTIFICATIONS

Computer Web Development

Seminole State College of Florida
December 2015

Information Technology Analysis

Seminole State College of Florida
December 2015

IT Client Specialist

Seminole State College of Florida

- Designed, implemented, and deployed features for legacy back office software systems focused on PHP and MSSQL.
- Partnered with stakeholders and business users to deliver successful technical solutions.
- Developed a Salesforce API integrated system to support the sales and marketing team, written in Golang.

Varsity News Network, Grand Rapids, MI — *Software Engineer*

August 2017 - March 2020 | Remote

- Object-oriented PHP development and Git-based version control.
- Automated testing (TDD, BDD, full stack integration, and continuous integration).
- Development & Support for JS single page applications and REST APIs using Silex and Doctrine, ReactJS, Symphony, Angular.js, Node.js, and their supporting ecosystems.

Remote-Learner, Denver, CO — *Frontend Developer*

July 2018 - March 2020 | Remote

- Delivered advanced Moodle and Totara LMS custom solutions, improving user experience and performance for enterprise clients.

US Signal, Grand Rapids, MI — *Senior Application Developer*

2015 - 2017

- Promoted twice from PHP Analyst to Senior Application Developer within two years. Architected and maintained enterprise CRM and billing systems using PHP, Zend, PostgreSQL, and Git based deployment workflows.
