MITCHELL L. DAWKINS II

(407)-716-8886 | hello@mitchelldawkins.com

Portfolio | *LinkedIn* | *GitHub* | *Football Software*

SUMMARY

Full-stack software engineer with 10+ years of experience building production applications, APIs, internal tools, and data-driven systems across enterprise and sports technology environments. Experienced with JavaScript, React, TypeScript, REST APIs, SQL, AWS, Git-based development workflows, and AI-assisted software development. Combines deep technical experience with lifelong involvement in football as a former Division I wide receiver at Eastern Michigan University and six-year high school football coach, including personally designing and developing software used to support football operations, player development, practice planning, attendance, strength training, and film evaluation.

EXPERIENCE

SportsBiz — *Senior Full Stack AI Engineer*

Jul 2026 - Present (contract) | United States

- Architect and ship full stack AI-driven product features as a senior engineer within SportsBiz's Center of AI Excellence, partnering with the Tech Lead, data science, and product teams.
- Deploy daily-use AI tools and reusable components that elevate the brand and strengthen user trust across sports marketing workflows.
- Establish scalable frameworks, systems, and engineering standards to accelerate AI code creation and team velocity.
- Build world-class full stack solutions spanning backend services, APIs, and reactive frontends for a sports marketing platform.

AdHoc Research Associates, Havre de Grace, MD — *Senior Computer Programmer*

Oct 2025 - Present (contract) | Remote

- Architect and deliver custom enterprise web applications using PHP 8+ and VueJS, leading full stack development initiatives aligned with stakeholder and federal engineering requirements.
- Integrate automation and AI assisted development workflows to accelerate delivery, improve testing coverage, and enhance code quality standards.
- Design scalable backend services and RESTful APIs in PHP while building reactive, component driven frontends using VueJS and modern JavaScript tooling.
- Apply advanced problem solving and systems analysis techniques to reduce technical debt and guide long term application architecture strategy.

Godwin Heights Football Operations Platform — *Full-Stack Developer*

2024 - Present | Grand Rapids, MI

ghfb.360web.cloud

React • TypeScript • Node.js • REST APIs • PostgreSQL • AWS

- Designed and developed an integrated software platform around real-world football coaching and program operations.
- Built attendance and coach check-in tools to track player participation and team activity.
- Developed weight-room planning and athlete tracking tools supporting strength and player development workflows.
- Created a live practice timer and scheduling system for managing practice periods and daily plans.
- Built a wide receiver film evaluation and grading system for weekly player assessment and season-long performance tracking.
- Continue to develop tools based on firsthand coaching needs, turning football workflows into practical software solutions.

Dropbox, San Francisco, CA — *Full Stack Engineer*

May 2021 - April 2025 | Remote

- Led AI chatbot rollout to revamp tier one support, boosting CSAT by 20% and ensuring seamless cookieless tracking for Chrome compatibility.
- Built full stack applications supporting multi million dollar revenue pipelines, integrating third party APIs for scalable, user centric solutions.
- Owned real time production monitoring and SEV incident response using Sentry, Kibana, and PagerDuty, safeguarding monetization pipelines and A/B testing systems.

TECHNICAL SKILLS

Programming & Development Frameworks

JavaScript, TypeScript, Python, Laravel, Express.js, Node.js, PHP, React.js, Vue.js, MongoDB, MySQL, MariaDB, Postgres, TDD, BDD, Unit testing

DevOps

Linux, Apache, Nginx, Docker, AWS, Redis, Jenkins, Git, Gitlab, Github, Elasticsearch, Slack, Sentry, Vortex, Selenium, Kibana, Logstash, PagerDuty, CI/CD, Babel, NPM, Yarn

EDUCATION

Bachelor of Science, Information Systems Technology

Seminole State College of Florida

Magna Cum Laude

Associate in Science, Computer Programming and Analysis

Seminole State College of Florida

Magna Cum Laude

TECHNICAL CERTIFICATIONS

Computer Web Development
Seminole State College of Florida
December 2015

Information Technology Analysis
Seminole State College of Florida
December 2015

IT Client Specialist
Seminole State College of Florida

Computer Programming
Seminole State College of Florida
December 2015

Computer Programming Specialist
Seminole State College of Florida
December 2015

EXPERIENCE, CONTINUED

Dropbox, San Francisco, CA — *Full Stack Engineer (continued)*
May 2021 - April 2025 | Remote

- Drove measurable performance gains across internal services by identifying and resolving latency bottlenecks through systematic profiling and optimization.
- Architected API integrations to streamline workflow automation between Dropbox tools and third party platforms, reducing manual engineering overhead.
- Led cross functional initiatives to improve internal tooling, infrastructure reliability, and deployment processes across multiple engineering teams.
- Built data driven dashboards to surface platform efficiency metrics, enabling proactive bottleneck resolution and reducing incident response time.

ThriveDX, Miami, FL — *Lead Software Development Instructor*
December 2020 - December 2023 (Part-time) | Remote

- Instructed students in programming fundamentals and equipped them with the skills necessary to become successful Software Engineers.

Service Express, Grand Rapids, MI — *Senior Software Engineer*
July 2020 - April 2021 | Remote

- Designed, implemented, and deployed features for legacy back office software systems focused on PHP and MSSQL.
- Partnered with stakeholders and business users to deliver successful technical solutions.
- Developed a Salesforce API integrated system to support the sales and marketing team, written in Golang.

Varsity News Network, Grand Rapids, MI — *Software Engineer*
August 2017 - March 2020 | Remote

- Object-oriented PHP development and Git-based version control.
- Automated testing (TDD, BDD, full stack integration, and continuous integration).
- Development & Support for JS single page applications and REST APIs using Silex and Doctrine, ReactJS, Symphony, Angular.js, Node.js, and their supporting ecosystems.

Remote-Learner, Denver, CO — *Frontend Developer*
July 2018 - March 2020 | Remote

- Delivered advanced Moodle and Totara LMS custom solutions, improving user experience and performance for enterprise clients.

US Signal, Grand Rapids, MI — *Senior Application Developer*
2015 - 2017

- Promoted twice from PHP Analyst to Senior Application Developer within two years. Architected and maintained enterprise CRM and billing systems using PHP, Zend, PostgreSQL, and Git based deployment workflows.
